

# Nutrition Know-How

## **Nonstarchy Vegetables**

There are 2 types of vegetables—starchy and nonstarchy. Starchy vegetables like potatoes, corn, and peas are considered grains, since they contain more carbohydrates. There are numerous nonstarchy vegetables (below are a few common ones).

- Artichoke
- Asparagus
- Beans (green, wax, Italian)
- Broccoli
- Brussels sprouts
- Cabbage (green, bok choy, Chinese)
- Carrots

- Cauliflower
- Cucumber
- **Eggplant**
- Greens (collard, kale, mustard, turnip)
- Mushrooms
- Onions
- **Peppers**
- Radishes

- Salad greens (chicory, endive, escarole, lettuce, romaine, spinach, arugula, radicchio, watercress)
- Squash (cushaw, summer, crookneck, spaghetti, zucchini)
- Sugar snap peas
- Tomato
- Turnips

#### Best choices and general tips

- Fresh, frozen, and canned vegetables and vegetable juices without added sodium, fat, or sugar (if using canned or frozen vegetables, look for ones that say low sodium or no salt added on the label).
- Frozen or canned vegetables in sauces are higher in both fat and sodium.
- If using canned vegetables with sodium, drain the vegetables and rinse with water then warm in fresh water. This will cut back on how much sodium is left on the vegetables.

### **Fruits**

There are many fruits to choose. Listed below are a few common ones:

- Apple
- Grapes
- Pear

- Apricot
- Kiwi
- Plum

- Banana
- Mango
- Raspberries

- Blueberries
- Orange
- Strawberries

- Cherries
- Peach
- Watermelon

#### Best choices and general tips

- Choose fresh, frozen, or canned fruit without added sugars in juice or light syrup.
- Dried fruit and fruit juice are also nutritious choices, but the portion sizes are small, so they may not be as filling as other choices.

**Eat the Rainbow** 

**Enjoy lots of vegetables** and fruits and the variety of nutrients they offer by choosing from the rainbow of colors available.
